

Custom Fabricated Response Equipment

Extreme Terrain & Conditions Mobile Platform For All Applications From
Tactical To Practical

Applications:

Fire & Rescue:

- Mobile command center
- Fire fighting support
- Grass fire suppression
- Forestry work and fire fighting
- High water rescue
- First responders
- Equipment supply and delivery
- Extreme terrain search platform
- Capability to transport fire suppression fluids
- Evacuation platform
- Dive platform

Police and Tactical Response:

- Fugitive and missing person search rescue platform
- Tactical support
- Mobile command center
- Equipment transport to remote locations through all terrains
- Public interaction and awareness
- Emergency response support

Industrial & Entertainment:

- Group tours through all terrains
- Photo safari tours
- Big game hunting
- Transport to remote locations
- Mobile operations center
- Personnel and equipment transportation
- Extreme condition survey equipment transport

Oil Field

- Personnel or equipment hauling to flooded or fouled drilling or frac locations
- Easy access to inland water or swamp locations
- Access to flooded tank farm areas

Standard Equipment Features

- Steel 5 ton rated chassis, all poly bushing and S.S. hardware
- All aluminum 50/60 series removable body, 114" x 22' floor area
- Dual console/helm, marine 12 circuit switch panel with breakers
- Dual high back seats with harnesses
- Removable engine access hatch
- Floor mounted cargo control track system
- Pre-wired for emergency lighting 12/24 volt
- Pre-plumbed with 2.5" passages for fire suppression hoses
- Front and rear access
- Safe floor interior coating
- Hydraulic front rack
- Exterior LED lighting package
- 5 ton leaf spring suspension
- 5 ton top loader Rockwell axles
- Cummins 8.3 lt. turbo diesel engine
- 50 gallon fuel capacity
- Allison Automatic transmission
- Dual breaking system, air over hydraulic
- Full hydraulic steering
- 28L-26 Super Forestry rated tires with custom steel wheels
- 16,500# Winch
- Rear mounted Pinal hitch
- Extreme Liner Poly-urea exterior coating on lower half
- Polyurethane top coat color matched all surfaces

Popular Options

- 4-link or 3-link coil over suspension system
- Enclosed cab area, curtain enclosures
- Custom body length, dual rear axles
- Aluminum canopy top with rip-stop canvas
- High water package, snorkeled exhaust and intake system
- Brush package, spray bars, monitors, spray nozzles, hydraulic pump, on board dual 500+ gallon belly tanks/ ballast tanks
- Removable rescue seating
- Draft capabilities
- PAC-TRAC system walls
- Exterior LED flood/spot lighting
- Electronics packages including monitors, Cameras, etc.
- Buoyancy package, water seals and floor drains
- Extra heavy load suspension with 10 ton air bags
- Multiple tire and wheel packages depending on terrain
- Auxiliary generators and compressors
- Storage cabinets
- Loading ramps
- Several communications packages available
- Porta-potty and / or potable water system
- Tactical storage systems
- FLEER systems
- Stainless steel and aluminum diamond plate dress packages
- Custom graphics and paint
- Equipment and material storage racks

ABOUT US

The Shop Off-Road and founders of Critter Gitters Hunting Equipment have been creating, designing and manufacturing the world's most sought-after Exotic Hunting Vehicles. The design requirements have been specific for terrains such as the wilds of Africa, deserts of Abu Dhabi and the brush, thorn and swamp country of South Texas.

With 29 combined years of design and fabrication experience, we have completed multiple projects with local police, fire and rescue agencies. Our proven reputation and commitment allow us to design and build specialty equipment for state agencies, Civil Defense, and nationally-recognized search and rescue organizations such as Texas EquiSearch.

Although natural disasters are never welcome, when they do occur it accentuates the need to develop specialized equipment to minimize the loss of life and property. In the last several years, with the grass fires of Dallas and central Texas and the hurricanes of the Gulf Coast, we have identified the real-time needs of the public, while combating such catastrophes with adversity. Over the last four years we have been developing equipment that meets these challenges, and created a formidable platform to combat multiple types of disasters as well as extreme industrial applications.

The versatility of the RSR platform has not truly been exploited and the capabilities may never be exhausted. If we have not yet designed a mobile platform that meets your needs, it is only because we haven't met with you!

The RSR platform is here to help minimize the impact of natural disasters. It will aid police and various emergency agencies, advance fire fighting, and support multiple commercial applications. RSR is here for your unique and specific needs.
